

Download 2003 Range Rover Rave Manual

At 32,000 KM's you are early for plugs. Here in the states they tell us every 60,000 miles. That being said, I replaced mine at 30,000 miles with Bosch Platinum Plus 4's and along with Magnacor wires, I got a good boost of low end power. I have an '02 Freelander 2.5l with about 110,000 miles. When I start up the car in the morning it makes a terribly loud clacking sound. To me it sounds like tappet noise, but once the car is warmed up the noise goes away. Hi Jay-Are you located in the US? The codes are different for North American Models than the UK/EU Version but I think I found the answer to your question. andover freelande code F4 this fault appears when the engine RPM goes up to above 4000 before the gear shifts the problem is in the gear box ...Don't trust these people. They may act all nice and want to help but nope!! They tell you that their cars never been to an accident and all that...well that's a lie.
