Cirrus's SR20 is a low-wing four- or five-seat composite airplane best known for its incorporation of an airframe parachute, which, in the event of a midair collision or other disaster, can float the plane and its passengers down for a 1,500 fpm landing on the ground. The Cirrus Design Technical Publications Department strives to produce the best possible technical manuals in the general aviation industry. Working to GAMA specifications and in accordance with Federal Aviation Regulations, they are responsible for producing and maintaining the Instructions for Continued Airworthiness as specified in the Airplane Maintenance Manual and the Operating ...
