What is PhysioEx? PhysioEx consists of twelve laboratory simulations and a histology slide tutorial. The lab simulations can be used to supplement wet labs, allowing students to conduct experiments that may be difficult to perform in a wet lab due to time, cost, or safety concerns. Students will be able to access their course eTextbooks or Digital Content on the first day of classes through their online course. However, they are also given the opportunity to Opt-Out of using the Digital Text during the first two weeks of class which will cause them to lose access to the Digital Text. They will then be responsible for obtaining a print copy of the text.
