Academia.edu is a platform for academics to share research papers. Wireless sensor network (WSN) refers to a group of spatially dispersed and dedicated sensors for monitoring and recording the physical conditions of the environment and organizing the collected data at a central location. WSNs measure environmental conditions like temperature, sound, pollution levels, humidity, wind, and so on. These are similar to wireless ad hoc networks in the sense that ... A variable-frequency drive is a device used in a drive system consisting of the following three main sub-systems: AC motor, main drive controller assembly, and drive/operator interface.:

210–211 AC motor. The AC electric motor used in a VFD system is usually three-phase induction motor. Some types of single-phase motors or synchronous motors can be advantageous in some situations, but ...
